

5 Reasons You Need SAP Digital Supplier Network Membership

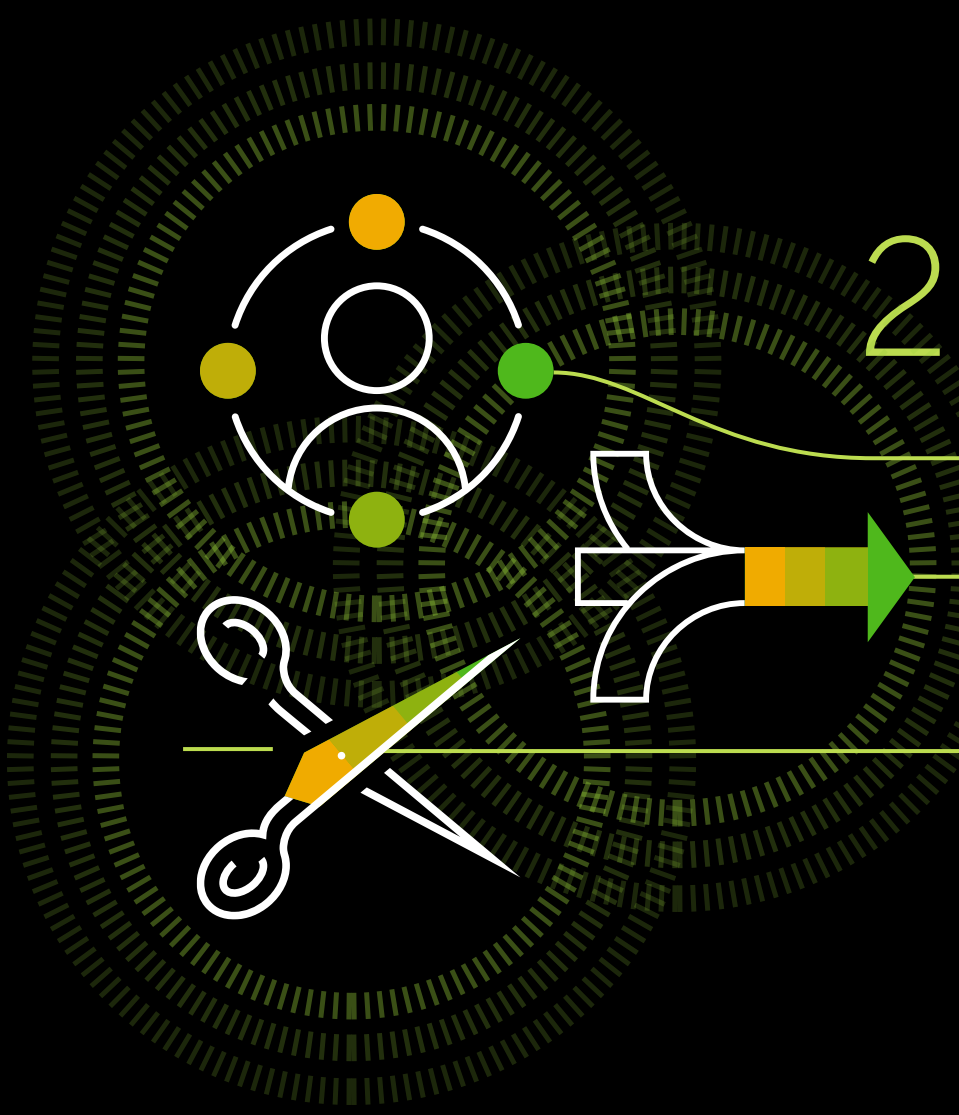

If you need to send POs or receive invoices, you need to connect the processes between your ERP and your suppliers. It's one critical step on the path to the Intelligent Enterprise, improving supplier collaboration and delivering five big benefits along the way.

1 Save enough to cover the cost.

Enjoy a rapid ROI and capture more discounts from your suppliers.

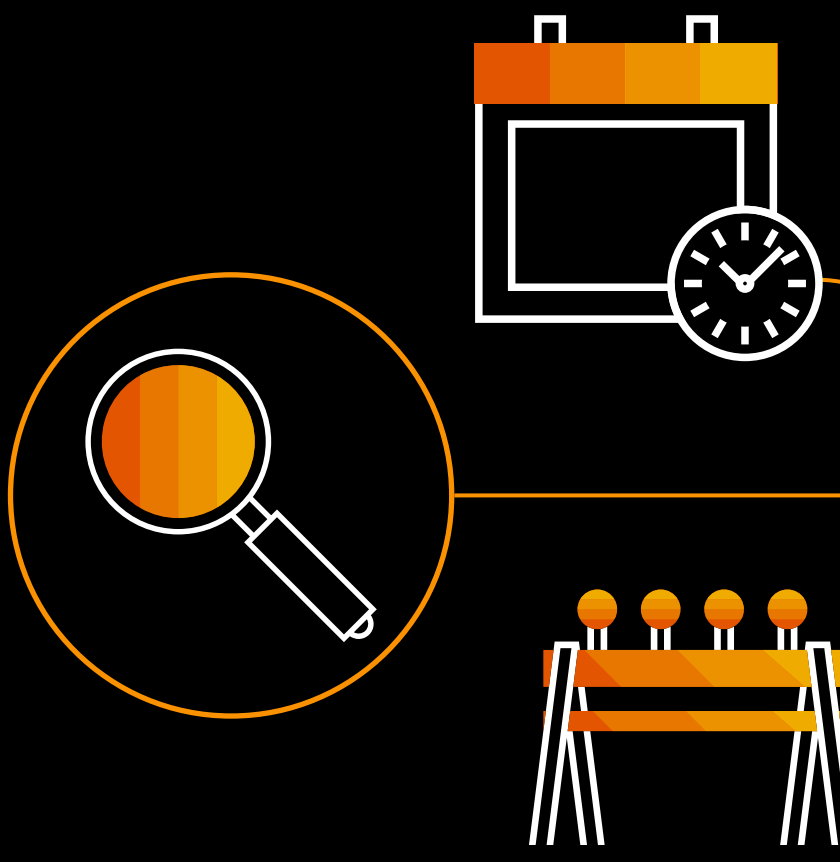

- **Increase** in cash flow **4-6%**
- **Increase** discount savings **3.8X***
- **Avoid** the pain of building and maintaining your own system, which could cost over **3X** more

2 Do the work once.

SAP is a #PlatformForLife, no matter where your business takes you.

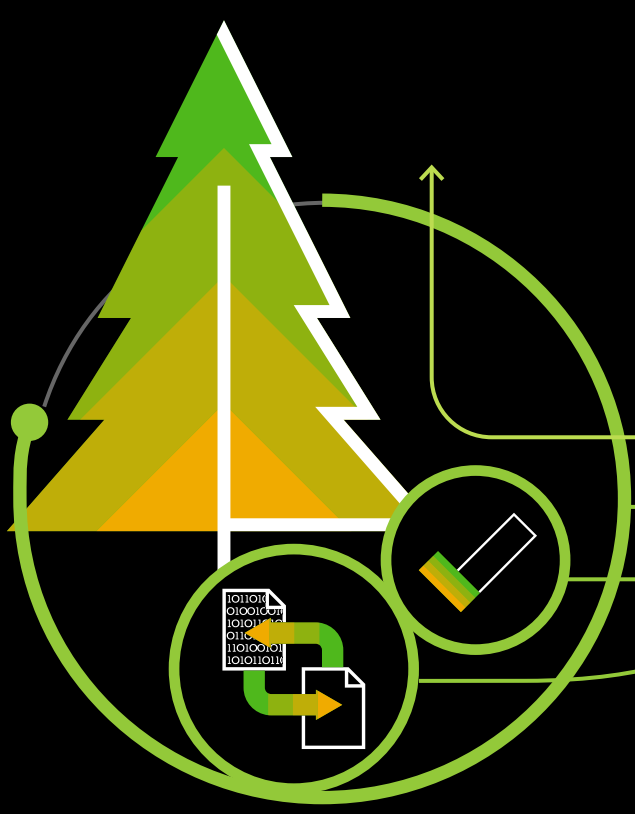

- **Manage** one relationship for ERP, procurement, and spend management
- **Add** new markets and business units — or merge with other organizations — without a new provider
- **Eliminate** the heavy maintenance and costs of EDI connections

3 Gain transparency to improve payments.

Get the visibility and flexibility to match payments to your priorities and needs.

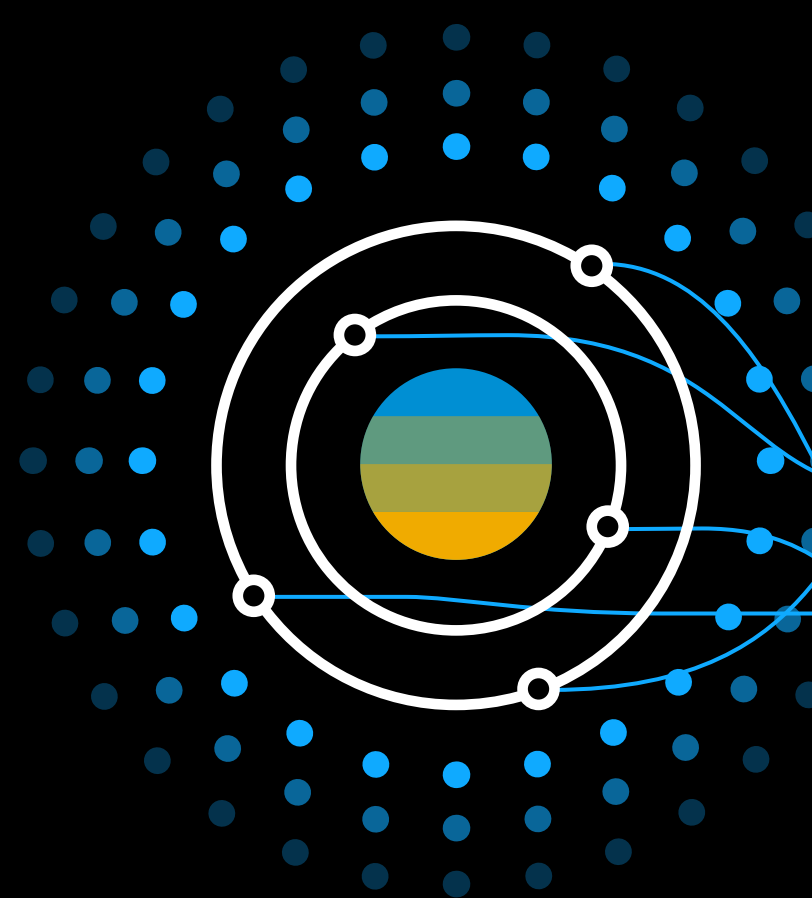

- **Strategically** time payments to improve cashflow
- **Give** suppliers full visibility into payment status to reduce calls and questions
- **Block** payments until goods or services have been received

4 Save the trees and your time.

Yes, accounts-payable automation eliminates paper, but it also gets rid of manual processes.

- **Increase** efficiency **3-4%**
- **Improve** the payables process by **80%**
- **Eliminate** procure-to-paper system
- **Flip** digital POs into invoices

5 Make global business easier.

Take the complexity out of managing suppliers in markets around the world.

- **Do** business across languages and currencies on one network
- **Stay** ahead of tax regulations and compliance requirements with automatic cloud updates

To create simple, seamless supplier collaboration, you need the SAP digital supplier network membership in your SAP S/4HANA transformation.
